**CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”)  
OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK  
EXCHANGE”)**

The GEM has been established as a market designed to accommodate companies to which a high investment risk may be attached. In particular, companies may list on the GEM with neither a track record of profitability nor any obligation to forecast future profitability. Furthermore, there may be risks arising out of the emerging nature of companies listed on the GEM and the business sectors or countries in which the companies operate. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of the GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on the GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on the GEM.

The principal means of information dissemination on the GEM is publication on the Internet website operated by the Stock Exchange. Listed companies are not generally required to issue paid announcements in gazetted newspapers. Accordingly, prospective investors should note that they need to have access to the GEM website in order to obtain up-to-date information on the GEM-listed issuers.

## 1 **Reorganisation and basis of presentation**

### (a) **Reorganisation**

The Company was incorporated in the Cayman Islands on 16 March 2000 as an exempted company with limited liability under the Companies Law (Revised) of the Cayman Islands. The Company became the holding company of the Group on 26 August 2000 through a reorganisation (the “Reorganisation”).

### (b) **Basis of presentation**

The Group resulting from the Reorganisation has been regarded as a continuing group. Accordingly, the consolidated results have been prepared on the basis of merger accounting, under which the Company was the holding company of the Group for both periods presented, rather than from 26 August 2000. Furthermore, the results of the Group for the periods ended 30 June 2002 and 2001 included the results of the Group with effect from 1 April 1999 or since their respective dates of incorporation, whichever is a shorter period. In the opinion of the Board, the resulting consolidated results give a more meaningful view of the results of the Group as a whole.

All significant intra-group transactions and balances have been eliminated in the preparation of the consolidated results.

### (c) **Statement of compliances**

The consolidated results have been prepared in accordance with all applicable Statements of Standard Accounting Practice and Interpretations issued by the Hong Kong Society of Accountants and accounting principles generally accepted in Hong Kong.

## 2 **Turnover**

The principal activities of the Group are the provision of systems development and consultancy services and sales of software and hardware products. Turnover represents income arising from the provision of systems development and consultancy services, provision of IT engineering and technical support services, provision of training courses and the sales of software and hardware products.

An analysis of the turnover by principal activities of the operations of the Group during the reporting periods is as follows:

The general reserve can be used to make good losses and to convert into paid-up capital.

No transfer to the general reserve was made by the PRC subsidiaries during the period.

## **DIVIDEND**

The Board has resolved not to recommend the payment of dividend for the three months ended 30 June 2002 (2001: Nil).

## **Chairman's Statement**

During the past quarter, the Group initiated action to rationalize its resource base, and refine its business direction and deployment approach. During this period, the Group further prepared its e-Business Innovation Centre for ISO 9001:2000 certification in the People's Republic of China (the "PRC").

## **BUSINESS REVIEW**

For the quarter ended 30 June 2002, the Group recorded a turnover of HK\$10.2 million (2001: HK\$6.0 million). The loss attributed to shareholders amounted to HK\$7.1 million (2001: HK\$14.2 million). The loss can be attributed to sluggish local and worldwide market factors. The Group has made every effort to strengthen cost control, the loss was therefore decreased tremendously when compared with that of last year.

During the three months ended 30 June 2002, the Group continued to invest in further developing its products and devising ways to accelerate time-to-market for those products it believes as having high potential. Certain research and development costs were written off as expenses as a prudent measure to reflect the impact.

The Group also continued to streamline its laboratories in the PRC to compliment the Group's primary development capability in Hong Kong. The corporate fiascos in the United States compounded the already depressed investment psychology that had resulted from the September 11th tragedy; the recent events further prolonged the downturn of the stock market in North America, Hong Kong, and the PRC. The business climate in the world market remained as sluggish and pessimistic as the previous year, if not more severe.

As such, the stock market turnover in Hong Kong and the PRC remained thin this past quarter, and local brokerage houses have continued to maintain their wary wait-and-see approach. This reluctance to invest in technology systems continued to affect the Group as the anticipated take-up rate for the Group's signature stock brokerage trading systems and associated services fell short of expectations. In response to these negative signs, the Group took further action to rationalize its production, sales and marketing strategy in addition to reducing expenses.

The Group has also made appropriate directional adjustments for both long term and short term marketing strategies for its products and services. In response to fierce competition, the Group has reduced its sales and marketing teams as cut-throat pricing have become rampant and disproportional to actual costs.

During this period, the Group instituted down-sizing exercises in response to the further downturn of the information technology solutions market, and across the board downward salary adjustments were instituted.

The Group has been increasing production efficiency overall and has reduced costs by steering non-reactive workload from Hong Kong to the PRC. The Group's product development team in the PRC has achieved the dual role of enhancing its research and development capabilities -which is kept to a level proportionate to product demand - and extending its capabilities in performing skilled systems development work.

During the first quarter, the Group continued to focus on distribution channels while continuing to make enhancements on the Group's product lines in both North America and Europe. The Group's North American subsidiary SYSTEKIT Innovations Inc. ("SYSTEKIT") in Toronto, Ontario, Canada has been active in sales, marketing, technical support, and fulfillment. SYSTEKIT and its products has recently been certified by a major international pharmaceutical company as being appropriate for their international use. SYSTEKIT has been serving as the Group's primary base in launching the Group's products and services in both North America and Europe, and has shown good potential in growth.

## **BUSINESS OVERVIEW**

It continues to be a challenge for the Group to maintain a satisfactory turnover for this financial year. The wariness of the adverse business environment worldwide further deepens the intense price competition throughout the service industries, resulting in even leaner margins.

The recently announced ITSD T-20 outsourcing contract further reflects the depressed state of the Hong Kong's information technology marketplace. The Group foresees further salary reduction and further attrition of IT personnel in Hong Kong within the next two years.

The Group's method of overcoming these market challenges is by transforming itself into a product company. By establishing a stable portfolio of products, it will be able to achieve greater margins and a more stable

revenue stream. This will be achieved by concentrating on strengthening its products' competitive edge and elevating the Group's status to that of an international technology provider rather than a local integrator. Finally, in positioning the Group for the economic recovery, the Group will also need to keep its good people challenged.

The Group will continue to observe the market situation and adjust its resource deployment tactics and strategy in anticipation of the economic situation.

## Financial Performance

For the three month ended 30 June 2002, the Group recorded a turnover of approximately HK\$10.2 million which represents an increase of approximately 69% over the same period in 2001. Loss attributable to the shareholders for the three months ended 30 June 2002 was approximately HK\$7.1 million as compared to a loss of approximately HK\$14.2 million, representing a decrease of approximately 50% over the same period in 2001.

Some of the losses during this quarter were attributed to costs associated with the termination of employees.
